The Pencil tool One of the Photoshop core tools, the _Pencil tool_ (refer to Figure 2-1) is used for creating line art and is available for the CS6 Corel Draw version. It is also available on some of the newer vector graphics programs such as Adobe Illustrator. If you need to create vector artwork, you can simply convert your raster art into vector. Chapter 7 provides more detail on vector artwork and conversion into vector. **Figure 2-1:** The Pencil tool enables you to draw with a brush. | --- | --- The Pencil tool is considered the fastest most responsive tool in the applications suite. Although it is similar in appearance to the Brush tool (discussed in the next section), it is actually a Brush tool, with a pen that can create lines and other shapes. In addition, you can hold down the Shift key to use it as a Brush tool. It is most likely the first tool you will need when designing photos. You can edit the size of the Pencil tool by clicking the right mouse button and scrolling the mouse up or down to change the size. Figure 2-2 illustrates the Pencil tool with the size set to 10,100 pixels in width. (Note that when you are working with the Pencil tool and holding down the Shift key, the default brush size will be 256 pixels.) **Figure 2-2:** The Pencil tool is the first tool you'll use in the Photoshop toolbox. | --- | --- Unlike the Brush tool (explained later in this chapter), the Pencil tool is great for creating a small or just one line of an image. For example, you could use the Pen

want to teach you how to learn Photoshop using Photoshop Elements. Read on! It's not possible to watch my tutorials on YouTube because I don't have a YouTube channel. The best way to learn Photoshop is to follow the steps I'm going to show you using the touch screen on your computer. Be sure to download Adobe Photoshop Elements 14.1 (or 14.1.1) before you proceed with this tutorial. 1. You need to create a new document in Photoshop Elements. Click on the New Menu and click on Document. 2. Then click on the Size Menu and pick a size that will comfortably fit your image. I recommend that you pick Image, 1280 x 720, so you have the perfect fit for most of your images. Don't worry about the other sizes, they will be covered later. Click OK and you should have a document of a certain size. 3. Now all we have to do is resize the image to the size we want to start with. Click once on your image and then drag the white box you see on the left to the right side of the image, so it will fit all the way down. If your image is too big, you can click on the Crop Tool and drag it to the left or right so the 388ed7b0c7

What's New In Photoshop 2022 (Version 23.4.1)?

Nick Turse, an independent journalist and member of The Intercept's investigative reporting team, recently traveled to Syria to report on the militants' "Sharia Police" and their role in the human rights abuses of the civil war. The reporter spoke with Al-Monitor about his experiences. What follows is an edited version of their conversation. Al-Monitor: Why did you decide to go to Syria? Advertisement Nick Turse: I've been in the region of Northeast Africa since 2013 and visited the West Bank, Yemen and Gaza. Most recently, in mid-May I visited Morocco, but after a few days I wanted to travel back home to the U.S. and try to get to Syria. The first problem was that my visa wasn't clear enough for Jordan. But then I got to Turkey, and my Jordanian visa was clear enough to go. I took a flight to Istanbul and changed flights there to Amman. But that took a few days because two days into the trip I was like, I'm going to Syria. I had been reading about the Kurds and their humanitarian situation and feeling sort of angry about what the U.S. was doing, which was basically putting the blame on them and essentially telling the Kurds to deal with ISIS. So I made the decision that I would go to Syria and see for myself what was happening there and see what other people were saying. When I arrived in Syria on May 20 and drove to Afrin, which is the area the Kurds are trying to take control over, it seemed that things were good. The people were very friendly. The Kurdish fighters, the People's Protection Units [YPG], were all over the place. There were miles of burning tires of Peshmerga burned on the main street in the city where they have liberated the city. It seemed like a great city. Then I went over the river and when I got to the other side, things were a little odd. It seemed like it wasn't really controlled by the YPG. There was an ISIS logo with a star in the middle. It was just a little bit of an odd situation. After that, I went to Aleppo. What I witnessed there was pretty shocking. There were whole cities and towns that had totally been destroyed. It looked like it hadn't been bombed by any aircrafts, but by some kind of explosive. If there were any kind of war crimes that had
