9f8sf1d.jpg) Pre-installation tips: 1. You need at least 4GB RAM, 8GB will make you more comfortable for studying the English OS. 2. If you have the computer media chip, it is recommended to use the media chip instead of the Windows/NT hard drive. 3. In the manual procedure, you need to connect the internet access, because Windows OS requires internet access. All-new 2006-2013 Ford Mustang Will Have Full-Time AWD Tuesday, December 12th, 2005 The 2006-2013 Ford Mustang will feature a different version of the legendary GT350/GT500 platform. The base GT model will be moved to the smaller engine, making room for a rear-wheel drive version. No word yet on whether the V6 will still be offered. The new rear-wheel drive Mustang is expected to be priced similarly to the base Mustang EcoBoost and the V8 GT. Fuel economy and performance have not yet been confirmed. The new platform is based on the production version of the current supercar, the Lightning. It will feature a full-time all-wheel drive system. Engine choices will include both the 4.6L V8 and the 5.4L V10. Both will be used in FWD and AWD models. It appears the Eibach suspension will remain, at least for now. The Mustang will be offered as a convertible. Is this a new Mustang or a Viper? I think it is pretty clear they will build a more nimble car to replace the slower GT350 and GT500. These supercars are slow as hell in the corners, and the chassis was designed for performance. I think they will up the performance more than the "performance" Mustang offered in the 70s, 80s, and 90s. The new platform is based on the production version of the current supercar, the Lightning. It will feature a full 82157476af
